

KR 203P Attaching System

The KR 203P attaches a wide variety of cards and pre-packaged samples onto various mailers and inserts.

An affordable alternative to high priced systems, the KR 203P is designed for mailing/packaging operations requiring **ease of use, durability and versatility**. A straightforward and trouble-free design **reduces operator training and setup time**. Ideally suited for short run jobs, the KR 203P is long run capable as well. Precision manufactured components, heavy-duty construction and traditional craftsmanship results in a truly **rugged and dependable system** capable of handling a wide range of material.

Samples are accurately placed and quick-setting hot melt adhesive secures them in position. Where appropriate, peel-away adhesives permit sample removal and are easy to clean up.
